RJN Group, Inc. Provides Rain Gauge / Rainfall Services for the Baltimore County Department of Public Works

Wheaton, IL (April 28, 2009) – RJN Group, Inc. recently extended a rain gauge / rainfall services project for the Baltimore County Department of Public Works. The project provides rain gauge and rainfall data to the County which meets requirements of Baltimore County's October 5, 2005 Consent Decree. RJN has installed 45 rain gauges throughout the County to collect rainfall data and by using Dopplar radar technology provides rainfall measurement on a grid system throughout the County. The measurement and analysis will be used in conjunction with flow metering data to characterize each of Baltimore County's sewershed service areas. The data will also be used to evaluate the effectiveness of measures implemented by the County to reduce infiltration and inflow and increase system capacity. The project began in November 2006 and will continue through November 2010.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
