## **RJN Group, Inc. Begins Comprehensive Flow Monitoring Program in Baltimore, MD**

Wheaton, IL (March 6, 2006) – RJN Group, Inc. was recently selected by the City of Baltimore, Maryland, to provide a comprehensive flow monitoring program for areas including the Gwynns Falls and Patapsco Sewersheds in addition to the City's main interceptor system. Further, RJN will be providing Doppler Radar Rainfall and rain gauges as part of the requirements under the Consent Decree issued by the United States Environmental Protection Agency (EPA) and the State of Maryland Department of the Environment (MDE). The project will begin in February 2006 and continue through February 2009.

RJN will be responsible for an extensive flow monitoring program throughout the sensitive Gwynns Falls & Patapsco Sewersheds. The program will consist of utilizing state-of-the-art wireless technology and open channel flow monitoring to determine a system wide capacity assessment. Additionally, RJN Group, Inc. has been selected to monitor the City's Interceptor System. This flow monitoring program includes monitoring in the most challenging conditions in the system. These sewers contain pipes up to and including 147 inches in diameter and serve as the main transporter of raw sewage to the City's treatment plants.

RJN Group, Inc. is a leader in providing engineering services and information technology software to municipal, county, state, and federal clients for the past 31 years. The firm is headquartered in Wheaton, Illinois with offices in Collinsville and Chicago, Illinois; St. Louis, Missouri; Dallas, Fort Worth, Austin, and San Antonio, Texas; Little Rock and Fayetteville, Arkansas; Tulsa, Oklahoma; Vienna, Virginia; and Baltimore, Maryland.

RJN provides public works engineering and information technology services for the development, maintenance, and management of municipal infrastructure systems including sewer, water, drainage, roads, bridges, and in addition, GIS services. Projects include engineering studies, preliminary and detailed design, construction engineering, and maintenance management. The firm provides the CASS WORKS® family of software products for tracking of asset inventories, maintenance activity, physical inspection and histories, and related management systems. RJN also provides CASSView™, a GIS deployment tool providing direct access to GIS, CASS WORKS, and other related data.
