## **RJN Group, Inc. Selected for City of Evansville Septic Tank Location & GIS Study**

Wheaton, IL (September 2, 2009) – RJN Group, Inc. (RJN) was recently selected on a team with Powers Engineering to examine which properties in the Evansville, Indiana, area are at the point where they need to be on sewer instead of septic. RJN and Powers Engineering are collecting data from various sources (public domain, city/county) and analyzing the useful data. Thematic maps will be produced showing the location of septic tanks, condition of septic tanks, and others with a final map showing the priority ranking for each property with a septic tank. GIS analysis will provide spatial correlations for the report to the client. The project will be completed in January 2010. This report will provide the overall plan of providing sewerage to the parts of the community not served by sanitary sewers.

RJN provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois, with offices nationwide.
