RJN Group, Inc. Selected for Flagg Creek Water Reclamation District Study

Wheaton, IL (March 14, 2008) – RJN Group, Inc. was recently selected to perform an evaluation of the Yorkshire Lift Station for the Flagg Creek Water Reclamation District. The lift station has reached the end of its useful life and is in need of replacement and expansion in order to accommodate the proposed Elmhurst Hospital development in the lift station service area. RJN will also evaluate nearby lift stations to determine if they can be cost effectively incorporated into a new Yorkshire Lift Station. Feasible options will be evaluated on a 30-year cost basis. The final selected option will then move forward to final design. The assessment began in November 2007 and is slated to be completed in April 2008.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
