RJN Group, Inc. Evaluates Overflows in the Turtle Creek Interceptor For Highland Park / University Park, Texas

Wheaton, IL (April 9, 2007) – RJN Group, Inc. was selected to evaluate the cause(s) of overflows and provide recommendations to eliminate the overflows in the Turtle Creek Interceptor. The extent of the interceptor evaluation is anticipated to include the entire interceptor from Lover's Lane in University Park to the point that it discharges to the City of Dallas. The impact of the discharge from Southern Methodist University into the interceptor will also be evaluated as part of the project. The evaluation is slated to begin in March 2007.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
