RJN Group, Inc. Selected for Examination for the City of Hot Springs, Arkansas

Wheaton, IL (December 30, 2008) – RJN Group, Inc. was selected to perform a wastewater collection system examination for the City of Hot Springs, Arkansas. RJN will perform collection system examination services including city wide flow monitoring, GPS survey of manholes, full descent manhole inspections, smoke testing, and hydraulic modeling. The results will allow RJN to identify deficiencies in the City's collection system which are contributing to infiltration and inflow (I/I) and overflow problems. The examination will help the City to more effectively operate and maintain their collection system and eliminate I/I and sewer overflows which will save the City money in treatment costs. The assessment is slated to begin in January 2009.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
