Jeffrey A. Kaestner, P.E. Receives the RJN Group's Visibility Award

Wheaton, IL (June 26, 2008) – Jeffrey Kaestner, P.E., of RJN Group, Inc.'s Collinsville, Illinois office received the 2007 Visibility Award from the firm at a Strategic Planning Meeting in St. Louis, Missouri. Employees must be nominated and go through an interview process to receive this honor.

RJN's Visibility Award is given annually to one RJN employee (nationwide) for best promoting the company with vigor and dedication. This award will be given to the individual whose professional activities in the past year most strongly contributed to the enhanced visibility and reputation of the firm. Those activities can include, but are not restricted to: activity in professional societies, participation in organization committees, presentations made to clients and at technical meetings, etc.

Mr. Kaestner's role as Project Engineer at RJN includes raising awareness of a wide variety of service offerings that the firm provides, outside of the Wastewater Collection niche upon which RJN was founded more than 30 years ago. For the past year Mr. Kaestner has built relationships with community stormwater contacts. He has been the lead in regional initiatives in both Missouri and Illinois, greatly increasing RJN's "visibility." His energy, enthusiasm, and professional expertise have built outstanding consultant relationships with potential clients and business contacts.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. Core services also include GIS and asset management. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
