RJN Group, Inc. Selected for Kirkwood Culvert Replacement

Wheaton, IL (Date) – RJN Group, Inc. (RJN) was recently selected to design a culvert replacement on Ann Avenue in the City of Kirkwood, Missouri (Kirkwood). The purpose of this design project is to produce contract documents to allow for Kirkwood to solicit bids for the replacement of a culvert under Ann Avenue between Meyer Avenue and Wind Grove Road. RJN will develop design documents for public bid of the necessary work. In order to provide this work product, RJN will obtain a survey and geotechnical investigation of the existing conditions to determine soil conditions and make geotechnical recommendations for design of the new culvert. RJN will prepare plans consisting of a title sheet, typical sections, plan and profile sheets, cross sections, sewer profiles, culvert plans, specifications, and a cost estimate. These plans will be used to coordinate with utility companies to allow for relocation of their facilities. RJN will prepare final plans consisting of all sheets included in the pre-final design with the addition of a summary of quantities sheet, survey tie sheets, traffic handling plans, standard drawings, erosion control, and final culvert details. A final copy of the specifications, hydraulic calculations, structural calculations, geotechnical recommendations, and cost estimate will be submitted to Kirkwood upon completion of the project.

RJN provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois, with offices nationwide.
