RJN Group, Inc. Completes Fast-Track Water Main Design for Lake Forest

Wheaton, IL (April 5, 2004) – RJN Group, Inc. was contracted by the City of Lake Forest, Illinois to complete the fast-track design for replacement of 4,800 linear feet of 40-year old, 6-inch and 8-inch diameter water main experiencing a higher than normal occurrence of breaks. Presence of many large trees created design and construction challenges. The new water main was designed as 8-inch and 12-inch diameter ductile iron pipe to be installed by combination of open-cut and trench-less techniques. This “fast track” design was completed in 30 days, allowing the City to construct the project prior to the winter season, which would reduce maintenance costs, breaks, and service disruptions.

Engineering services for this project consisted of field surveying, best route development and design (including preparation of plans, specifications, and bid documents); and assistance in bidding process and construction contract award.

RJN Group, Inc. is a leader in providing Engineering Services and Information Technology Software to municipal, county, state, and federal clients for the past 28 years. The firm is headquartered in Wheaton, Illinois with offices in Collinsville, Illinois; St. Louis, Missouri; Dallas, Fort Worth, Arlington, Austin, Houston, and San Antonio, Texas, Fayetteville, Arkansas; Tulsa, Oklahoma; Norcross, Georgia; Deerfield Beach, Florida; Vienna, Virginia; and Boston, Massachusetts.

RJN provides public works engineering services and information technology services for the development, maintenance, and management of municipal infrastructure systems including sewer, water, and drainage. Projects include engineering studies, preliminary and detailed design, construction engineering, and maintenance management. The firm provides the CASS WORKS® family of software products for tracking of asset inventories, maintenance activity, physical inspection and histories, and related management systems. RJN also provides CASSView™, a GIS deployment tool providing direct access to GIS, CASS WORKS, and other related data.
