**RJN Group, Inc. Assesses Sanitary Sewer System Condition  
for the City of Midland**

Wheaton, IL (December 26, 2008) – RJN Group, Inc. was selected to assess the sanitary sewer system for the City of Midland, Texas with a primary focus on structural issues and secondary focus on maintenance and I/I sources in the collection system. RJN's responsibilities including field services (manhole inspection and GPS survey), analysis, GIS tasks, reporting, and assistance to the City. RJN will collect and review data from delineated drainage sub-basins in the City's collection system service area. There are ten sub-basins within the area and approximately 1,000 manholes in each sub-basin. The project will determine the most cost-effective method of rehabilitation for the City of Midland's wastewater collection system. The defects/manholes will be prioritized for repair using an adjusted MACP rating system. The assessment began in June 2008 and is scheduled for completion in May 2009.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
