RJN Group, Inc. Inspects 716 Residential Buildings for Wheaton

Wheaton, IL (January 3, 2006) – Due to a high peak flow in the sanitary sewer system after a rain, the City of Wheaton hired RJN Group, Inc. to conduct a building inspection program to identify potential sources of infiltration / inflow (I/I) that enter the system from the private sector. The program involves inspection of 716 residential buildings in the Briarcliff Knolls, Farnham east of Cosleys and southeast of Geneva Road, and President regions of the City. RJN was selected for this program due to an outstanding performance record of cost-effectively locating I/I sources, as well as a high rate of success in building inspection programs, one of which was for the City of Wheaton. The project will begin in January 2006 and continue through the Spring of 2006.

RJN Group, Inc. is a leader in providing engineering services and information technology software to municipal, county, state, and federal clients for the past 31 years. The firm is headquartered in Wheaton, Illinois with offices in Collinsville and Chicago, Illinois; St. Louis, Missouri; Dallas, Fort Worth, Austin, Houston, and San Antonio, Texas, Fayetteville, Arkansas; Tulsa, Oklahoma; Vienna, Virginia; Boston, Massachusetts; Baltimore, Maryland; Deerfield Beach and Miami, Florida; and Atlanta, Georgia.

RJN provides public works engineering and information technology services for the development, maintenance, and management of municipal infrastructure systems including sewer, water, drainage, roads, bridges, and in addition, GIS services. Projects include engineering studies, preliminary and detailed design, construction engineering, and maintenance management. The firm provides the CASS WORKS® family of software products for tracking of asset inventories, maintenance activity, physical inspection and histories, and related management systems. RJN also provides CASSView™, a GIS deployment tool providing direct access to GIS, CASS WORKS, and other related data.
